

Safa Ayari

Data Scientist & IA Apprentice

Schedule: 3 weeks company / 1 week school | Available immediately
Paris, France | National mobility | Phone : +337 53 02 01 52

Email: sapaayari@gmail.com | LinkedIn : [SafaAyari](#)

Profile

Currently pursuing a Master's in Data Engineering & Cloud Computing at *Aivancity Paris*, I am passionate about applying Artificial Intelligence and Machine Learning to real-world industrial challenges.

With a background in Data Science and FinTech engineering (ESPRIT), I have developed strong skills in model design, predictive analytics, and data-driven decision systems, as well as hands-on experience in MLOps, automation, and cloud deployment (Azure, Docker, Kubernetes).

I am now seeking an apprenticeship in Product Engineering – Artificial Intelligence, where I can contribute to the development of intelligent tools and AI/ML models that enhance industrial and manufacturing processes.

Motivated, rigorous, and curious, I aim to bridge data science and product innovation within a dynamic and cross-functional R&D environment.

Skills

Data Science : Machine Learning, Deep Learning, Analyse sémantique, Transformers(BERT , CamemBERT), Scikit-learn, Keras, PyTorch, Seaborn , Matplotlib TensorFlow | **Programming** : Python, R, JavaScript, SQL , JAVA , PHP ,C#| **Cloud&Devops** : Azure, AWS, Docker, Kubernetes, GitLab CI/CD, Jenkins | **Framework** : Django, Flask, Dash-Plotly, Streamlit, Spring Boot, Angular | **Data & BI** : SAS, DAX , Power BI, Tableau, Excel | **DataBase**: PL/SQL, NoSql, PostgreSQL | **Tools** : Git, Spark, Hadoop, JIRA | **Project Management**: Agile/Scrum

Education

- **Master's Degree in Data Engineering & Cloud Computing**- Aivancity, Paris (2024 - 2026)
- **Engineering Degree in Computer Science – Data Science & FinTech** - ESPRIT, Tunisia (2020 - 2026)

Professional Experience

Data Scientist/Analyst & MLOps - DPTE (Direction Prévision & Transition Énergétique) | Engineering Internship

May 2024 - dec2024

- Developed an LSTM model for energy forecasting (95% accuracy), reducing human errors from 60% to <5%.
- Built a Flask chatbot and Power BI dashboard to support decision-making.

Deployed the entire system on Azure AKS, with Grafana/Prometheus monitoring, achieving an 85% reduction in team processing time.

AI Banking & Full-Stack Developer- BIAT (Banque Internationale Arabe de Tunisie) | Summer Internship

May 2023 - Sep 2023

- Designed a document management platform using OCR + NLP for automated information extraction, reducing processing time by 80% and eliminating manual errors through intelligent workflows. Coordinated between data scientists, DevOps, and business teams to ensure model reliability.
- Managed JIRA backlog and automated repetitive tasks using RPA
- Implemented CI/CD pipelines with Docker & GitLab, ensuring smooth and secure delivery.

Data & Process Automation - UBCI (Union bancaire pour le commerce et l'industrie) | Internship

Jun 2022 – Aug 2022

- Built regulatory automation pipelines: Basel II and AML reports, Power BI dashboards (LCR, solvency), and smart alerts, reducing reporting time by 70%

Projects

GenAI Chatbot: Extracts PDF data and generates contextual answers using BERT Transformers and Streamlit (90% accuracy). Agent **de**

Intelligent Trading Agent: Portfolio optimization, sentiment analysis, and interactive dashboards (Power BI, Django, Dash-Plotly), cutting prediction errors by 20%.

Time Series Forecasting: Apple stock trend prediction using SARIMA (R)

Anomaly Detection: Security incident prediction integrated with Flask (95% precision).

Black-Scholes Model Reproduction: Option pricing using RNN (98% accuracy), fully integrated in Django.

Languages

Languages : French (C2), English (C1), Arabic (native)

Associative Involvement

Club Santé Esprit 2020-2024 | **Club Libertad radio** 2020-2021 | **Croissant Rouge** : 2016-2022
